LED Industrial High Bay Lighting

Uplight Module Option

With innovation and flexibility in mind, Light Emitting Designs introduces the first true modularized, dual-sided, light-emitting highbay fixture. The uplight was designed and engineered specifically for applications requiring visual depth and ceiling height perception, such as big-box retail stores, supermarkets, airports, and upscale venues.

The uplight module is designed with a dedicated heatsink and is IP68-rated (water, vapor and dust-proof), providing over 3,500 lumens of upward light. The module is designed to provide discreet upward lighting without diminishing the aesthetics of the IL450.

Uplighting is available in all color temperatures and can be used with PDS or CH4 mounting options only. See the Ordering Information section for more about uplighting.
